

**Supplementary Table S1. Speaker nationality fixed effects (Model 1)**

| Nationality | Estimate ( $\beta$ ) | Std. Error | t    | p      |
|-------------|----------------------|------------|------|--------|
| Czech       | 0.88                 | 0.21       | 4.15 | < .001 |
| Estonian    | 0.53                 | 0.23       | 2.34 | .024   |
| French      | 0.43                 | 0.23       | 1.86 | .069   |
| German      | 0.39                 | 0.19       | 2.00 | .052   |
| Lebanese    | 0.82                 | 0.25       | 3.28 | .002   |
| Swedish     | 0.44                 | 0.21       | 2.09 | .042   |
| Taiwanese   | 0.60                 | 0.24       | 2.49 | .017   |

**Supplementary Table S2. Full fixed effects – Model 2 (Impediments)**

| Predictor                | Estimate | Std. Error | t     | p      |
|--------------------------|----------|------------|-------|--------|
| Translanguaging (any)    | 0.12     | 0.04       | 3.07  | .002   |
| Turn length              | 0.05     | 0.001      | 79.12 | < .001 |
| Lexical diversity (STTR) | -4.91    | 0.10       | -48.7 | < .001 |
| Plurilingualism          | 0.06     | 0.03       | 2.10  | .036   |

**Supplementary Table S3. Full fixed effects – Model 2 (Repairs & Discourse Markers)**

| Dependent variable | Estimate (TL) | Std. Error | t     | p      |
|--------------------|---------------|------------|-------|--------|
| Repairs            | 0.01          | 0.01       | 1.18  | .237   |
| Discourse markers  | -0.21         | 0.04       | -4.84 | < .001 |

**Supplementary Table S4. Full fixed effects – Model 3 (Impediments by translanguaging strategy)**

| Predictor                | Estimate | Std. Error | t      | p      |
|--------------------------|----------|------------|--------|--------|
| Codeswitching            | 0.07     | 0.05       | 1.46   | .144   |
| Codemixing               | 0.19     | 0.06       | 2.92   | .003   |
| Translation              | 0.26     | 0.16       | 1.64   | .100   |
| Turn length              | 0.05     | 0.001      | 79.59  | < .001 |
| Lexical diversity (STTR) | -4.93    | 0.10       | -49.20 | < .001 |
